Dear Parents/Caregivers

Re: Norwood Morialta is promoting STEM as a focus in the school.

The Science Faculty has subscribed to ‘COSMOS for Schools’ to support the teaching of STEM in the school. Your student has been using this interactive program on a regular basis in addition to the normal lecture/instruction in my Science lessons this term.

The aim of this program is to encourage students to connect with Science using curriculum-mapped topics, interactive tools and virtual lessons. Content is delivered in a variety of ways and students are challenged with a range of open-ended questions which is complemented with class discussion and live polls to seek student feedback.

This program is also accessible 24/7 to support independent learning outside of the classroom. Parents and teachers can view and monitor students’ work as they progress and provide them with real-time feedback.

I encourage you to visit www.stileapp.com with your student and to look at what we have been doing in Science this term. Feedback is most welcome to me via email on Damanpreet.kour740@schools.sa.edu.au

Yours sincerely

Damanpreet Kour
Science teacher
