Dear Parent/Caregiver

RE: Stage 2 Mathematics 2017

Your student is currently undertaking Stage 1 Pure Mathematics. This aligns with the Australian Curriculum as will Stage 2 in 2017.

It is important that you and your student are aware of the prerequisites for Stage 2 Mathematics Courses.

Stage 2 Specialist Mathematics – minimum 2 “B” grades required from the Pre-Specialist pathway (3 semesters) including “B” GRADES IN THE EXAMS

Stage 2 Mathematical Methods – minimum 2 “B” grades required from the Pure Mathematics pathway (3 semesters) including “B” GRADES IN THE EXAMS

If your student does not meet the prerequisites, they will be required to select an alternative subject. This may include the Stage 2 General Mathematics.

Please note, if your student wants to change to General Mathematics for Semester 2, they are required to collect a subject change form in Week 4 next term, of which they will need a parent/caregiver and coordinator signature.

Please do not hesitate to contact your student’s Mathematics teacher or myself via email jade.clifford210@schools.sa.edu.au if you require further information about the Stage 2 subjects.

More information will be released in the Curriculum Guide for 2017.

Yours sincerely

Jade Clifford           Jacqui van Ruiten
Mathematics Coordinator       Principal
